

# Medical Clinic For Uganda, Africa

**History** - Cheyenne Hills Church has teamed up with Homes of Living Hope for a clinic in Uganda, Africa. The vision is to connect people in America with those in need all around the world. Since we have orphanage land in Uganda and connections there on the ground, we believe this project will be very successful.

**Cheyenne Hills Part** – We will be outfitting the container with rooms for the clinic, by actually building walls and a door inside the container. Each room will have cabinets, a sink and hopefully a examination table. The window and doors will be cut out by the African's after the container is put into place. We are working on running water, and electricity also since both are close to the area in Lira, Uganda where this clinic will be placed.

**How to Help** – This shipping container is to ship all kinds of things, so we plan to fill it with useful items for our friends in Africa. Mosquito nets are of great value since Malaria is such a problem. We are working on the best deal for nets, but in the meantime groups or organizations could raise money for mosquito nets. We are working with a group that provides water filter items as well. Again groups could raise money or donate to water filters. We have one group that sells water filter straws for \$1 each. These over sized straws filter water for one person for one year, and could be a way for a group to participate in this project. Soccer balls, shoes, cloths etc. etc. are other ways in which individuals or groups could be involved in packing this container for Africa.

**Why Uganda?** – Cheyenne Hills has a five year relationship with New Covenant Community Church in Uganda who has 56 churches in the area. We have provided oxen, bicycles, church roof tops, water wells, etc over the years. In 2009 we sold \$8,000 in Africa beads and purchased land for an orphanage in Lira. This year we want to put this medical clinic on this land and begin to bring quality medical help to the area.

**Who will staff the clinic?** - Homes of Living Hope have contacts with two groups who will provide qualified medical personnel in Uganda if there is a satisfactory facility for the doctors and nurses to practice. Therefore, we are providing a key component to much needed medical help with this shipping container.

**How to Contribute** – You or your group can make checks payable to Cheyenne Hills Church and all of the money will go to the purchase of nets, or water filtration or whatever else you desire.
